Summary Report of FY 2008 Hospital Financial Performance

Introduction

The global economic crisis has affected hospitals nationwide and in Connecticut. According to the recently published *New England Economic Partnership-Economic Outlook 2009-2013*,¹ all sectors of the economy in all states in the New England region are being strongly impacted by the current recession. Additionally, a combination of forces are reshaping the hospital industry, including rapid technology advancements, an aging population, increased consumerism, impending physician shortages, underlying reimbursement and cost pressures, and growing competition. This dynamic environment creates both opportunities and challenges for hospitals. This report provides a summary of hospital performance and presents some key fiscal year 2008 statewide hospital financial indicators and trends in the context of the current environment and economic climate.

The Office of Health Care Access (OHCA) collects financial and statistical information from Connecticut's thirty acute care hospitals on an annual basis in accordance with state statute and regulation. This report covers fiscal year 2008 which ran from October 1, 2007 through September 30, 2008. The primary information source for this report is the hospitals' audited financial statements which include balance sheet and statement of operations information.² Other sources of information for this report are the annual hospital filings submitted to OHCA, which include utilization statistics. uncompensated care data, free bed funds and legal charts of corporate structure.³ All of the state's thirty acute care hospitals are not-forprofit with the exception of Essent-Sharon Hospital, a for-profit hospital. It is important to note that the fiscal year covered in this report ended on or before September 30, 2008, prior to the severe national economic downturn beginning approximately in October of 2008 and continuing to date.

¹Gittell, Ross, "Economic Outlook, 2009-2013", New England Economic Partnership, Spring 2009, p.34.

reported by the hospitals for FY 2008.

²Certain reclassifications have been made to the fiscal year ended September 30, 2007 balances previously reported in the balance sheets and statements of operations and changes in net assets in order to conform with the fiscal year ended September 30, 2008 presentation. Johnson Memorial Hospital financial statements were not audited in FY 2007 or FY 2008. On November 4, 2008, Johnson Memorial Corporation and its affiliates filed a petition for Chapter 11 protection at the United States Bankruptcy Court, District of Connecticut.
³Some FY 2007 financial and statistical data elements previously reported have been updated by the hospitals. This updated information has been included to improve reporting accuracy and comparability of FY 2007 data elements to those

Hospital Income and Financial Performance

Hospitals must be able to generate sufficient cash flow to pay for operations and debt service, to provide a source of capital for facility needs and strategic initiatives and to increase cash reserves. In FY 2008, the revenue hospitals received for patient care, net patient revenue (NPR), grew 7.8% over the prior year. Statewide NPR was \$7.8 billion, comprising 94% of statewide operating revenues. Half of hospital net revenues continue to be derived from governmental payers, Medicare, Medicaid and Medical Assistance. There was no significant shift in statewide gross or net revenue payer mix between FY 2007 and FY 2008.

The impact of the recession is apparent in the area of nonoperating income, which is derived primarily from investments in stocks and bonds, the value of held securities, endowments and charitable contributions. In FY 2008, hospitals statewide earned close to \$109 million in income from operations which was offset by non-operating losses of close to \$182 million, resulting in an overall deficiency of revenue over expenses of a little over \$73 million as shown in **Table 1** below. This amount differs dramatically from the prior year excess of revenue over expenses of \$292 million.

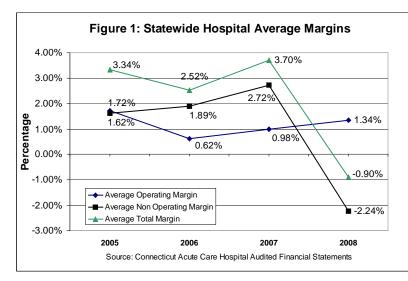

STATEWIDE HOSPITALS STATEMENT OF OPERATIONS SUMMARY	2005	2006	2007	2008
Net Patient Revenue	\$6,365,307,654	\$6,752,114,926	\$7,238,684,924	\$7,802,450,397
Other Operating Revenue	\$339,559,991	\$384,275,145	\$438,711,539	\$509,295,943
Total Operating Revenue	\$6,704,867,645	\$7,136,390,071	\$7,677,396,463	\$8,311,746,340
Total Operating Expenses	\$6,587,690,012	\$7,091,354,777	\$7,599,727,808	\$8,203,146,356
Income/(Loss) from Operations	\$117,177,633	\$45,035,294	\$77,668,655	\$108,599,984
Non Operating Revenue	\$110,480,159	\$137,739,063	\$214,440,149	(\$181,800,544)
Excess/(Deficiency) of Revenue over Expenses	\$227,657,792	\$182,774,357	\$292,108,804	(\$73,200,560)

Table 1:

With the declines in the economy and financial markets since September 30, 2008, it is reasonable to anticipate that the decline in statewide non-operating income in the current fiscal year, FY 2009, may be greater than in FY 2008. Much depends on the timeline to recovery and on whether the economic downturn, which began in December 2007, winds down as anticipated as a range of policy efforts are implemented to speed recovery.

In FY 2008, 53% of acute care hospitals lost money. Acute care hospital total margins ranged from a high of 5.22% to a low of - 6.29%, with a statewide median of -0.58% and a statewide weighted average of -0.90%. Sixteen (or 53%) of 30 acute care hospitals reported negative total margins in FY 2008, up sharply when compared to only five (or 17%) of hospitals reporting negative total

margins in FY 2007 (see Appendix M). A summary of statewide hospital financial performance is presented in **Figure 1** which shows the statewide hospital weighted average operating, nonoperating and total margins for the last four years.

Balance Sheet Strength and Liquidity

In FY 2008, weak investment performance eroded liquidity. In addition, for many hospitals, higher pension funding was another factor that limited liquidity growth. More than \$172 million in unrealized losses on investments were included in revenue/ (deficiency) in excess of expenses by fifteen hospitals in FY 2008. Fourteen hospitals reported a cumulative total reduction of more than \$97 million to unrestricted net assets attributable to unrealized losses on investments. Four hospitals had more than a \$29 million reduction in unrestricted net assets attributable to unrealized losses on their equity interest in their foundation for the same period. This results in a total statewide reduction in unrestricted net assets of more than \$298 million.⁴

⁴Other factors that impact the change to unrestricted net assets include but are not limited to transfers to and from affiliates, other unrestricted changes in joint ventures, and net assets released from restrictions for capital acquisition.

Total hospital net assets declined statewide by almost \$600 million from \$5.1 billion in FY 2007 to \$4.5 billion in FY 2008. In addition to the unrealized losses discussed above, other factors impacting the change in total net assets include changes to temporarily restricted net assets including net realized investment gains and losses, net change in the interest in the foundation, transfers to the hospital's affiliates and charitable contributions. The change in total net assets also includes changes to permanently restricted net assets primarily contributions, income/(loss) from investments, changes in funds held by others and changes in the equity interest in net assets of the foundation.

Adoption of Accounting Rule Changes

Many financial indicators provided in this report are based upon audited financial statements. In FY 2008 some accounting inconsistencies were present due to the year that full or partial adoption⁵ of the Financial Accounting Standards Board Statement of Standards (FAS) occurred including the following:

- FAS 115 Accounting for Certain Investments in Debt and Equity Securities, as amended by FAS 159 The Fair Value Option for Financial Assets and Financial Liabilities.⁶
- Differences in the hospitals' interpretation of how to apply FASB Staff position Nos. FAS 115-1 and FAS 124-1 *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments.*⁷
- FAS 158 Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans (due to differences in the hospitals' measurement date.)

These FASs are the authoritative source for properly applying U.S. generally accepted accounting principles in the valuation of investments and allow certain transactions to either be included in revenue/(deficiency) in excess of expenses (which also impacts the unrestricted net assets and total net assets) or included in changes to net assets. The method of recognizing these transactions will also impact non-operating revenue, unrestricted net assets, total net assets, non-operating margin, total margin, equity financing ratio, cash flow to total debt and long-term debt to capitalization ratios.

As a result of the downturn in the stock market, coupled with the adoption of FAS 158, many hospitals were required to devalue their investments and therefore increase their pension and other postretirement liability and decrease their unrestricted net assets by the same amount. In FY 2007 at least 25 hospitals either fully or partially adopted FAS 158 resulting in a decrease in unrestricted net assets of over \$38 million.⁸ Most notable is the range in adopting FAS 158 in FY 2007, from a negative adjustment of \$37.7 million to positive adjustment of \$68.6 million. Further, seven hospitals experienced both an increase in FY 2007 and a decrease in FY 2008, totaling over \$116 million and almost (\$152) million, respectively. Twenty-three hospitals reported a total reduction in unrestricted net assets and four hospitals reported a small increase in FY 2008 for a total of over (\$286) million due to changes in their pension funding obligation. At least six hospitals did not change their measurement date to September 30, 2008, and as a result these hospitals may be especially vulnerable to losses in unrestricted net assets in FY 2009.

Utilization Indicators

Utilization measures provide additional information essential to understanding hospital performance. After several years of growth, the number of statewide inpatient discharges declined by 1,065 to 429,612 total discharges in FY 2008 (thirteen hospitals reported an increase in discharges and seventeen reported a decline in discharges). There was a small increase in total patient days (17,329) from 2,076,032 in FY 2007 to 2,093,361 in FY 2008. The statewide average length of stay remained fairly stable at 4.9 days. Case mix index increased from 1.2206 in FY 2007 to 1.2745 in FY 2008. Connecticut's thirty acute care hospitals staffed a total of 6,688 beds and reported a statewide staffed bed occupancy rate of 86% in FY 2008, up from 81% in the prior year. Statewide total emergency department visits increased by over 20,000 or 1.3% for a total of 1,584,171 visits during FY 2008.

⁸This amount includes the entire health system of one hospital and the wholly owned subsidiaries of some hospitals.

One benefit of the weaker economy is lower employee turnover and lower vacancy rates. Statewide total FTE's increased by 1,679 in FY 2008 from 49,214 to 50,893 FTE's. However, it should be noted that several hospitals publicly announced labor force reductions in the news media in the current fiscal year, including Greenwich Hospital, Johnson Memorial Hospital, New Milford Hospital and Saint Francis Hospital.⁹

Presented below in **Table 2** is an analysis of inpatient hospital discharges by major payer category. Significant shifts in hospital discharges from one payer to another often help to explain changes in net revenue occurring in different fiscal years. Government discharges (Medicare and Medicaid) have been increasing steadily. In FY 2008, government discharges increased by 1.1%.

⁹Connecticut Business and Employment Changes Announced in the Media, June 2009 Connecticut Department of Labor, Labor Market Information. <u>http://www.ctdol.state.ct.us/lmi/busemp.htm</u>

Uncompensated Care

By law, all emergent, non-elective patients at Connecticut's hospitals must be treated, regardless of their ability to pay. Uncompensated care represents health care provided by hospitals to patients that will not be reimbursed. There are two levels of uncompensated care, charity care and bad debts. Charity care occurs when the hospital knows in advance that the care provided will not be reimbursed. Bad debts are incurred after the service has been provided, with no forewarning of non-payment. Statewide uncompensated care charges totaled \$638.5 million in FY 2008, increasing by \$88.9 million or 16% over FY 2007. Uncompensated care cost increased by 13%, or \$29.3 million in FY 2008, and accounted for 3.2% of total expenses. Bad debts totaled close to \$464 million or almost 6% of total operating expenses in FY 2008.

The Uncompensated Care Disproportionate Share Hospital (UCP DSH) Program is a joint federal/state program that was established to financially assist hospitals with their uncompensated and undercompensated care. Undercompensated care generally refers to government programs, like Medicaid, which tend to provide lower rates of reimbursement. The UCP DSH Program provides supplemental reimbursement to help offset these shortfalls and helps hospitals continue in their role as safety net to patients with limited access to health care. In FY 2008 UCP DSH Program payments totaled over \$53.7 million.

Five Year Financial Performance

Table 3 on the following page provides five-year weighted average total margins. Over several years, a negative total margin can be indicative of financial distress. Hospitals need a positive total income (total margin) to operate effectively. Those with a negative total margin are not receiving sufficient revenue to pay all of their expenses and must use other sources of funds such as cash reserves or the liquidation of assets to pay their expenses. In addition, hospitals must earn sufficient income to make improvements to facilities and equipment. Nine hospitals had negative five-year average total margins in FY 2008, and of these, six had negative total margins for at least three of the five consecutive fiscal years reported. Ten of the twenty-one hospitals with positive five year average total margins, also consistently sustained positive total margins for each of the five consecutive fiscal years reported. Overall, the statewide five-year weighted average total margin for FY 2004 through FY 2008 was 2.26%.

Individual Hospital Data

This report is intended to provide information and insight on issues and trends that affect hospital performance and financial stability as mandated in Section 19a-670(b)(6) of the Connecticut General Statutes. Fiscal year 2008 was clearly a challenging year for many hospitals. The following sections provide an aggregate statewide profile of hospital parent corporations, and aggregate statewide profile of hospital summary totals for both financial and statistical indicators, and individual hospital profiles of Connecticut's thirty acute care hospitals. The final section of this report contains detailed appendices by hospital parent corporation and by hospital as detailed in the table of contents. This page has been intentionally left blank.

STATEWIDE HOSPITAL PARENT CORPORATION PROFILE

Reported below is the total Statewide Parent Corporation statement of operations summary for Fiscal Year 2005 - Fiscal Year 2008, a summary of profitability margins and net assets and selected liquidity and solvency measures.

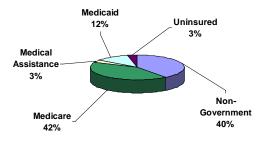

STATEWIDE HOSPITAL PARENT CORPORATION STATEMENT OF OPERATIONS SUMMARY	2005	2006	2007	2008
Net Patient Revenue	\$7,014,981,081	\$7,438,417,883	\$7,967,676,801	\$8,581,536,837

WILLIAM W. BACKUS HOSPITAL

The William W. Backus Hospital, founded in 1893, is located in Norwich. In FY 2008, the Hospital generated \$8.6 million in income from operations and experienced a \$5.6 million nonoperating loss, resulting in an excess of revenues over expenses of \$3 million. The Hospital reported 11,940 discharges and 50,512 patient days while staffing 202 of its 233 available beds. Reported below is a chart indicating all of the affiliates of Backus Corporation, the parent corporation of the Hospital, followed by various financial indicators and selected utilization measures.

*TRICARE is indicated since it comprises greater than 1% of hospital gross and net revenues.

JOHN DEMPSEY HOSPITAL

John Dempsey Hospital, located in Farmington, was founded in 1975 as the teaching hospital of the University of Connecticut Health Center and is also a statewide referral site for tertiary care. In FY 2008, the Hospital experienced a \$15.9 million loss from operations and realized a \$1 million non-operating gain, resulting in a deficiency of revenues over expenses of \$14.9 million. The Hospital reported 9,856 discharges and 60,012 patient days while staffing 224 of its 224 available beds. Reported below is a chart indicating all of the affiliates of the University of Connecticut Health Center, the parent corporation of the Hospital, followed by various financial indicators and selected utilization measures.

LAWRENCE & MEMORIAL HOSPITAL

Lawrence and Memorial Hospital, founded 1912, is located in New London. In FY 2008, the Hospital generated \$7 million in income from operations and a \$1.7 million non-operating gain, resulting in an excess of revenues over expenses of \$8.7 million. The Hospital reported 15,085 discharges and 71,524 patient days while staffing 252 of its 252 available beds. Reported below is a chart indicating all of the affiliates of Lawrence & Memorial Corporation, the parent corporation of the Hospital, followed by various financial indicators and selected utilization measures.

*TRICARE is indicated since it comprises greater than 1% of hospital gross and net revenues.

YALE-NEW HAVEN HOSPITAL

Yale-New Haven Hospital, founded in 1826, is located in New Haven. In FY 2008, the Hospital generated \$49.1 million in income from operations and experienced a \$48.4 million non-operating loss, resulting in an excess of revenues over expenses of \$700,000. The Hospital reported 52,124 discharges and 272,757 patient days while staffing 752 of its 847 available beds. Reported below is a chart indicating all of the affiliates of Yale New Haven Network Corporation, the parent corporation of the Hospital and an affiliate of the larger Yale-New Haven Health Services Corporation which includes Bridgeport Hospital and Greenwich Hospital, followed by various financial indicators and selected utilization measures.

Connecticut Acute Care Hospitals and Medical Centers

Average Payment Period: the average number of days that are required to meet current liabilities. A lower number of days is favorable, since it indicates a more favorable liquidity position.

Bad Debts: the income lost to the hospital because patients who were billed and from whom payment was expected did not pay amounts owed to the hospital for services provided. Bad debts net of recoveries will result in bad debt expense, if after reasonable collection efforts are made, the hospital determines that the accounts are uncollectible.

Case Mix Index: the arithmetic mean of the Medicare diagnosis related group case weights assigned to each inpatient discharge for a hospital during the fiscal year. The case mix index is calculated by dividing the hospital's total case mix adjusted discharges by the hospital's actual number of discharges for the fiscal year.

Cash Flow to Total Debt Ratio: an indicator of potential future debt repayment difficulty or insolvency. It is calculated by dividing excess of revenues over expenses plus depreciation by current liabilities plus long term debt. A decrease in the value of the ratio may indicate a future debt repayment problem.

Charity Care: the difference between the hospital's published charges and the amount of reimbursement received for services provided to patients from whom reimbursement was not expected. Charity care does not include bad debts, courtesy discounts, contractual allowances, self pay discounts, and charges for health care services provided to employees.

Current Ratio: the measure of the number of dollars held in current assets per dollar of current liabilities. High values imply a good ability to pay short term obligations and low values imply a lesser ability.

Days Cash on Hand: the average number of days of cash available to pay for expenses that is maintained in cash accounts. A higher number is favorable, since it indicates a greater ability to meet outstanding obligations.

Days in Patients Accounts Receivable: the average number of days in collection that patient accounts receivables remain outstanding. A lower number is favorable, since it indicates good collection practices that result in sufficient cash flow and infrequent short-term financing.

Disproportionate Share Hospital (DSH) Program Payments: the payments provided to Connecticut's acute care hospitals based on each hospital's cost of uncompensated care and medical assistance underpayment as a percentage of the statewide total of hospital uncompensated care and medical assistance underpayment.

Equity Financing Ratio: the ratio related to capital structure that indicates the percentage of net assets to total assets. A higher ratio is more favorable, since it indicates utilization of a higher level of equity and a lower level of debt financing in acquiring plant and equipment assets.

Excess / (Deficiency) of Revenue over Expenses: the difference between the sum of total operating revenue and non-operating revenue less total operating expenses that results in an excess or deficiency of total revenue.

Hospital Parent Corporation: the hospital's corporate holding company that controls through its governing body a hospital and the hospital's affiliates, as presented on the legal chart of corporate structure.

Income / (Loss) from Operations: the difference between total operating revenue and total operating expenses that results in a financial gain or loss from operating activities.

Long-Term Debt to Capitalization Ratio: the measure of the proportion of Long-Term Debt in a capital structure. A lower proportion or percentage is desirable because it allows for obtaining of more favorable terms (i.e., lower interest rates) when borrowing.

Net Assets: the residual amount of total assets after all current and long-term liabilities (including long-term debt) are deducted. Also referred to as ownership equity. **Net Patient Revenue:** the total gross revenue from patient charges less contractual allowances, less the difference between government charges and government payments, less charity care and less any other allowances.

Non-Operating Margin: the ratio related to profitability indicating the percentage of non-operating revenue to total revenue. A higher positive ratio indicates more favorable results.

Non-Operating Revenue: the unrestricted revenue not directly derived from providing patient services but obtained from either investment income or philanthropic and non-philanthropic sources.

Operating Expenses: the expenses necessary to maintain regular operating functions and to carry out ongoing activities.

Operating Margin: the ratio related to profitability indicating the percentage of income or loss from operations to total revenue. A higher positive ratio indicates more favorable operating results.

Operating Revenue: the total of net patient revenue from reimbursement of patient services by government and non-government payers plus other operating revenue.

Other Operating Revenue: the non-patient service operating revenue that is obtained from operating activities but is accounted for separately from patient service revenues. Other operating revenue includes revenues restricted by a donor or grantor for operating purposes, and also net assets released from restrictions.

Payer Mix: the proportion of each government or non-government payer's reimbursement to the hospital's total reimbursement for patient services. Payer mix is derived by determining the amount of total gross patient revenue or total net patient revenue that the hospital receives from each government and non-government payer. **Payment to Cost Ratio:** the ratio that indicates the percentage above or below cost that a hospital is reimbursed by a government or nongovernment payer. A ratio that is higher than 1.00 is favorable, since it indicates reimbursement by a payer that is greater than the cost of providing patient services. A ratio that is less than 1.00 is unfavorable, since it indicates reimbursement by a payer that is less than the cost of providing patient services.

Ratio of Cost to Charges: the ratio that indicates the percentage of total operating expense to the total of gross patient charges plus other operating revenue. A lower ratio is more favorable, since it indicates a greater difference between the cost and charges billed for providing patient services.

Total Margin: the ratio related to profitability indicating the percentage of income or loss from operations and non-operating revenue to total revenue. A higher positive ratio indicates more favorable results.

Uncompensated Care: the total amount of the hospital's charity care and bad debts resulting from unreimbursed patient services that are determined by using the hospital's published charges and consistent with the hospital's policies regarding charity care and bad debts.

Uncompensated Care Cost: the total amount of the hospital's charity care and bad debts at charges multiplied by the hospital's ratio of cost to charges.

Unrestricted Net Assets: the amount of net assets that is not restricted by donors or by a board of directors as to their use.
